

ROCCAT Kova Gaming Mouse

THERE ISN'T A SHORTAGE of mice on the market, from basic three-button solutions to over-engineered mice featuring up to 17 buttons. For most people, in particular those who play PC games, a mouse with at least five buttons is not only preferred but a necessity.

With that said, the ROCCAT Kova is one of the best-looking mice on the market. The design is simple and sleek, but it looks elegant; and with the constant switching of the lights, it really stands out. More than the great looks, however, it is how the mouse feels that is truly impressive. The feet glide across most surfaces easily, and the lightweight 90g design makes it very comfortable and it can be used for hours on end with no strain at all.

The only downside to the mouse is that the palm rest is a little shallow; and as such, if you have slightly bigger hands, the base of your palm will drag on the desk, which can be quite irritating.

If, however, you can overlook that, the Kova is probably everything you could need from a mouse. While the mouse doesn't have any drivers, it is still programmable using button combinations. This not only allows you to store macros and change the light

Specifications

Buttons: 7
Handedness: Ambidextrous
Interface: USB
Sensitivity: 3,200dpi

sequence on the mouse, but also allows you to select sensitivity on the fly. This is great for those who do not like taskbar programs that are usually present when using some other gaming mice. Best of all, it means your configuration for whatever game or title is always present, regardless of which computer you are using.

This mouse will not be for everyone, in particular because of the low profile of the mouse, but for those left-handed people out there who find themselves forced to use right-handed mice or generic office-type mice, the Kova is definitely for you. **NAG**

Bottom Line

The Kova is amongst the best ambidextrous mice on the market and definitely worth taking a look at, particularly if you're a lefty.

Plus

- + Sensitivity
- + Driver free
- + Looks

Minus

- None
